Subject: Pike hill mine clean up CIP Corinth Vt

Hi Mr. Swatts,

My name is Glynn Pellagrino. I am a member of the Corinth Conservation Commission but am writing as a community member of the town of Corinth.

I have attended some of the meetings on the Pike Hill mine clean up plan and wish to convey my support for the clean up of the site. And I would prefer the onsite capping plan over removal of the tailing waste. My background is in Environmental Biology and I experienced first hand the runoff from the Elizabeth mine in South Strafford when I lived in that area. My sense of the situation is that as our weather becomes more prone to heavy rain and flooding the damage from those waste piles will only become more problematic. I feel the sooner the issue is improved the better.

I would be happy to be involved in any way that is useful to speed this project along.
Thank you for your time on this matter.

Sincerely,
Glynn Pellagrino
